Dear Sir:

Applicants attorney conducted a phone interview on April 10th 2003 with the Examiner and John Nguyen. The claims generally were discussed in the context of whether or not the Examiner agreed patentable subject matter was present. The reference Stefanoni U.S. 5,217,177 was discussed particularly that the reference is directed to a tape machine, which does not and can not change the width of the tapes being cut to a second width while the machine is operating to cut tapes of a first width. Further amendment of the claims were not discussed. During the interview the Applicant stated the claims have been limited to slitters used on a paper making line, and the Examiner has not found any suggestion for using two sets of knives to change paper widths in an on machine slitter. Nor has the examiner found a slitter which changes paper widths on-the-fly. The principal reference applied by the examiner does not suggest changing paper width on-the-fly. Agreement was not reached

Applicant: Pauli Koutonen
Application No.: 09/905,550
Art Unit: 3654

Respectfully submitted,

Patrick J. G. Stiennon, Reg. No. 34934
